versatile in application  
and fast drying

**HC200**  
**HYDROFAN**  
**HI-TECH CLEARCOAT**  
Fast drying 2K water-borne clearcoat  
with high aesthetic aspect

Lechler's AQUA-Tech technology is now expanding with new products for processes with a **very low environmental impact**, but with even **more performance**.

- **USER FRIENDLY:** easy products by application, odourless and with reduced overspray
- **FAST DRYING BY LOW BAKING AT 60°C:** just some minutes more than the alike solvent-based products
- **VERY LOW ENVIRONMENTAL IMPACT:** emission reduction up to 80% compared to a similar solvent-based process

AQUA-TECH process allows you to **work in full respect of the surrounding environment** and operators, but without discounts on the final quality of the repair.

**There is no right process for all repairs, but there is a right process for every repair.**
